TILES INSTALLATION

Special Laying Instruction:

Tiles Spacers

We always recommend to use the Tile Spacer for laying of different tiles as per its type and size. Tile Spacer is specially designed to create a uniform gap between tiles, this results in proper alignment throughout the tiling area. It is available in different width sizes starting from 2mm width to 10 mm width.

Features and Benefits:

Spacers accommodate the movements due to thermal variations and different loads

When filled with the right grout material, they can efficiently reduce the free water flow / leakage through the joints and also make the joints anti - fungal and anti - bacterial

With spacers, we can create uniform designs and pattern

Improved aesthetics and dimensional stability to the entire tile/ stone assembly

It ensures longer life span of tile installation
